Professional Summary

Backend Engineer with 4+ years of experience building scalable microservices and REST APIs using Java and Spring Boot. Strong background in distributed systems, database optimization (PostgreSQL, HBase), CI/CD automation, AWS, and production support. Experienced in delivering high-availability systems, third-party integrations, and maintaining high code quality and security standards.

Education

Chameli Devi Group of Institutions, Indore

July 2017 – May 2021

B.Tech, Computer Science and Engineering

CGPA: 7.40/10

Experience

Infosys

Sept 2021 – Present

Backend Developer

Indore, India

- Designed and developed enterprise-grade **microservices** and **REST APIs** using **Java** and **Spring Boot** for high-traffic business workflows.
- Built secure, stateless APIs using **token-based authentication** and integrated them with frontend applications.
- Optimized **PostgreSQL** and **HBase** queries, improving API performance and reducing latency for critical services.
- Enabled **Feign-based inter-service communication** with fault tolerance to handle downstream failures.
- Automated **CI/CD pipelines** using **Jenkins** and **Docker**, improving release reliability and reducing manual effort.
- Supported containerized workloads on **Kubernetes**, enabling smooth deployments and rollback strategies.
- Performed **root cause analysis (RCA)** for production incidents and implemented permanent fixes to improve system stability.
- Delivered new APIs, feature enhancements, and production bug fixes across multiple releases.
- Executed **functional, integration, and regression testing** to ensure production readiness.
- Enforced code quality, security, and maintainability standards using **SonarQube**.
- Actively participated in **Agile ceremonies**, sprint planning, and code reviews.
- Leveraged **AI-assisted development tools** (GitHub Copilot, GPT, Claude, Gemini) to accelerate development while validating all outputs against enterprise security and performance standards.

Projects

COX Communications – Device Health Monitoring Platform | Java, Spring Boot, HBase, Jenkins, ServiceNow

- Architected an enterprise **device health monitoring system** to reduce downtime and improve laptop reliability.
- Enabled **real-time telemetry processing** for CPU, memory, IO, disk health, login duration, and network metrics.
- Engineered **rule-based proactive alerts** with actionable recommendations such as cache cleanup and disk optimization.
- Integrated **ServiceNow APIs** to auto-create helpdesk tickets for critical device issues, reducing manual intervention.
- Enhanced system observability and response time for IT support teams.

CMA CGM – Container Shipment Management System | Java, Spring Boot, Angular, REST APIs, PostgreSQL

- Engineered backend services for a **global container shipment management platform** supporting international logistics operations.
- Established modules for **customer allocation, commercial allocation**, goods categorization, and multi-route optimization.
- Optimized container utilization and routing to ensure timely deliveries across multiple regions.

Infosys Intelligence Workspace Platform | Java, Spring Boot, React, REST APIs, MySQL

- Architected backend services for a **Return-to-Office (RTO) platform** supporting hybrid work models.
- Delivered features for **desk and meeting room booking**, workspace utilization tracking, and access management.
- Strengthened space utilization visibility and ensured compliance with organizational RTO policies.

Technical Skills

- **Programming Languages:** Java, SQL
- **Core Concepts:** Object-Oriented Programming (OOP), Multithreading & Concurrency, Java Collections Framework, Exception Handling, JVM Memory Management, Design Patterns
- **Frameworks & Technologies:** Spring Boot, Spring Core, Spring Data JPA, Spring JDBC, Spring Security, OAuth2, JWT, Microservices Architecture
- **Cloud, Containers & DevOps:** AWS, Docker, Kubernetes, Rancher, Jenkins (CI/CD Pipelines)
- **Databases:** PostgreSQL, MySQL, HBase
- **Testing & API Tools:** Postman, OpenAPI/Swagger, JUnit, Mockito
- **Development Tools & IDEs:** IntelliJ IDEA, Spring Tool Suite (STS), Eclipse, VS Code, pgAdmin, PuTTY
- **Version Control & Collaboration:** GitHub, GitLab, Bitbucket
- **Monitoring & Code Quality:** SonarQube, ServiceNow
- **AI-Assisted Development:** GitHub Copilot (Claude Opus, GPT, Gemini)
- **Project Management:** Agile/Scrum, Jira, Confluence

Achievements, Awards & Accomplishments

- **Technology Champion Award – Cox Communications:** Recognized by the client for outstanding performance and consistent excellence throughout the year.
- **Insta Award – Infosys:** Honored for successfully leading the platform migration from Rancher to Anthos for APIs, ensuring seamless integration and improved efficiency.

Certifications

- Infosys Certified Spring Boot Professional.
 - Infosys Certified Spring Rest.
-
